Database Management System - PostgreSQL, MSSQL

Languages - Bosnian (native), English (C1), Norwegian (A1)

Experience

Ministry Of Programming, Software Engineer

Jun 2022 – present

- Implemented the leaderboards system for the company tracker application, tracking most completed activities and awarding users based on their placement (Next.js, React.js, TypeScript, HTML, CSS)
- Implemented the frontend of a complex, custom-made tool for gathering and analyzing large amounts of data with the e-commerce application, including displaying the same data within a Dashboard functionality (Next.js, React.js, TypeScript)
- Developed the separate application from scratch, dedicated to application's store vendor partners for the purpose of easier order processing and back office administration (Node.js, JavaScript, PostgreSQL, Strapi, AWS S3, GitHub Actions)
- Implemented the complete frontend of the social trading suite, including the feed, personal social profiles, listings of top master traders, and more (Next.js, React.js, TypeScript)
- I served as a team lead for fintech project for trading platform purposes where you can trade values using prices or lots (Next.js, React.js, TypeScript, TailwindCSS)

GRM Digital, Software Engineer

Oct 2021 – Jun 2022

- Implemented and developed the biggest company project with over 1+ million users (.NET Core)
- Implemented the STEM platform project (Next.js, React.js, JavaScript, Contentful)
- I served as a **team lead** on my last project for the job application project (Next.js, JavaScript, Node.js, Strapi)

Infinity Mesh, Intern

Jun 2021 – Sep 2021

- Designed and implemented all mentor's requirements for a news web app (.NET Core and React.js)

Upwork, Freelance Web Designer

Jun 2019 – Sep 2020

- Designed and implemented web application for a content creator (Next.js, React.js, Figma, JavaScript)
